

# Telephone Directory

WHITE SALMON-BINGEN

Lyle - Klickitat - Trout Lake  
Hood River - Odell - Parkdale  
Mosier

OCTOBER 1943

**Your operators are very busy in providing a vital service on the home front. Please assist them by eliminating unnecessary calls and cutting the time on conversation to the minimum.**

**Oregon-Washington Telephone Company.**

OREGON-WASHINGTON TELEPHONE COMPANY

# OREGON LUMBER CO.

Dee, Oregon

**WHOLESALE  
and  
RETAIL**

**Fir, Cedar, White Pine,  
Noble Fir, Hemlock  
Phone Odell 422**

**SLABWOOD  
GREEN AND DRY  
WOOD ORDERS  
PHONE 6451 or ODELL 422**

## DIALING INSTRUCTIONS

1. Remove the receiver from the hook.
2. Listen for the dial tone. Do not start to dial until you hear this tone.
3. Dial the number as it appears in the directory. After you have finished dialing you will either hear the ringing signal, indicating that your party is being rung, or the busy signal, indicating that the line is busy.

To call a number on your line, dial the operator; then say:  
"On This Line.....," giving the number you wish to call.

## SPECIAL NUMBERS

OPERATOR .....	Dial 0
PARKDALE .....	Dial 811
ODELL .....	Dial 821
WHITE SALMON .....	Dial 816
FOR INFORMATION .....	Dial 0

For calls to Trout Lake, Glenwood, Lyle, Klickitat and Goldendale, dial White Salmon. For all other out-of-town calls (except Odell and Parkdale) dial Long Distance.

**Owned and Controlled Within the Territory Which It Serves.**

## GENERAL RULES AND REGULATIONS

### Allowance for Failure of Service—

The Telephone Company does not guarantee uninterrupted working of its lines or equipment. In case service is interrupted otherwise than by the negligence or willful act of the subscriber, an adjustment will, upon application by the subscriber, be made in the amount of the charges for such of the service, equipment, and facilities furnished as are rendered useless or inoperative. Any adjustment shall apply only to the period the interruption continues beyond twenty-four (24) hours after notice in writing of the interruption is received by the Telephone Company. No other liability shall in any case attach to the Telephone Company.

### Change of Telephone Number—

The Company reserves the right to change any telephone number at any time to meet service requirements. However, no change will be made until the subscriber has received reasonable notice of such proposed change.

### Default of Payment or

### Other Breach of Contract—

All bills are due when rendered. Failure to receive a bill will not exempt the subscriber from prompt payment. In the event of any default of payment, or other breach of the rules, the company reserves the right upon proper notice to discontinue the subscriber's service or disconnect and remove the telephone equipment.

### Directories—

The telephone directory is published for the convenience of subscribers, but the company assumes no liability for damages to subscribers due to errors or omissions. No change in listings will be made or new listings inserted in the next issue of the directory, unless the necessary work of making the change or installation involved is completed before the directory form closes for the printers. The telephone directory is issued by and is the property of the Oregon-Washington Telephone Company, and shall be destroyed upon delivery of each later issue. All persons are warned against attaching any unauthorized advertisements, binder, holder, auxiliary cover or attaching any device that will in any way obscure or interfere with any authorized advertisement in the directory or on the cover thereof.

### Foreign Equipment and Advertising Rules—

The telephone equipment shall not be connected with any foreign equipment such as advertising novelties and devices for eliminating noise, aiding transmission, and destroying germs. Telephone instruments are designed to produce the best results and are necessarily sensitive and intricate. The many devices offered for sale are not only unnecessary but generally cause trouble, either of a mechanical nature or by marring the telephone instrument. In order to protect its service and equipment the Telephone Company will remove all advertising novelties and foreign devices from its instruments.

### Information and Transmission Service—

The Telephone Company assumes no liability for errors which may arise in imparting information nor for any errors or delays in transmission over the instruments and lines of the Telephone Company.

### Right of Access to Premises—

The agents of the company shall have the right to enter the premises of the subscriber, at all reasonable hours, for the purpose of inspection, repair or removal of the Company's equipment or wiring. The Company reserves the right to make observations of service rendered to the subscriber for the purpose of improving the service by detecting trouble or annoyances, or the improper use of the service by the subscriber. The subscriber has the right at all times to have proper identification of Telephone Company employees before permitting entry to premises or removal of Telephone Company property.

### Use of Equipment by Subscribers—

The service is for the exclusive use of the subscriber, his employees and members of his family. The equipment shall be surrendered to the Company upon the termination of the subscriber's contract. The Company reserves the right to take the line at any time, except on long distance or business calls, after five minutes time has elapsed. Your cooperation helps to give better service.

## LONG DISTANCE SERVICE

To place a long distance call remove the receiver from the hook and ask for Long Distance.

Information regarding the various classes of long distance service follows:

### Station-to-Station Service—

Should be used when you will speak with anyone who may answer the called telephone or when you know that the person with whom you wish to speak can be promptly summoned to the telephone by the answering party.

Rates for station-to-station service are lower than for other classes of long distance service because less operator labor and use of equipment are required.

### Person-to-Person Service—

Should be used when you wish to speak with a specified party. The rate for this class of service is somewhat higher than for station-to-station service as more time and labor is required to complete the call.

### Day, Night, and Sunday Rates for Station-to-Station and Person-to-Person Calls—

Day rates apply between 4:30 a. m. and 7:00 p. m. on all days except Sundays.

Night rates apply between 7:00 p. m. and 4:30 a. m.

Sunday rates apply on Sundays between 4:30 a. m. and 7:00 p. m.

### Appointment Calls—

May be made when you wish to talk with a specified party at a designated time. The

rate for this class of call is the same as the person-to-person rate.

### Messenger Calls—

When it is necessary to send a messenger to summon the person called to a telephone, it becomes a messenger call. The rate for this class of call is the same as the person-to-person rate plus the messenger charges.

### Reversal of Charges—

Charges may be reversed on all classes of long distance calls at any time without extra cost, except on station-to-station calls for which the rate is 20 cents or less.

### Report Charge—

A report charge is made on uncompleted person-to-person, messenger and appointment calls when failure to establish the connection is due to no fault of the Telephone Company. A report charge is also made on reversed station-to-station calls when the party answering the called telephone refuses to accept the charge and as a result the call is not completed.

(Report charges are subject to revised tariffs filed by the Pacific Telephone & Telegraph Co. governing interstate land line hauls).

### Rates and Charges—

Call the Chief Operator for a full explanation of different classes of long distance service and rates.

Subscribers are held responsible for ALL TOLL CALLS originating at the telephones.

THE UNITED NATIONS WILL WIN!

Just as the united people of the State of Washington and Klickitat County have won the right of low cost, consumer owned power. Let's finish the intermediate step, now, of public power for all, and be in a position to complete service to the rest of the county as soon as the war is ended.

## TROUT LAKE DIALING INSTRUCTIONS

### 1. Lift the receiver and listen for the dial tone.

The dial tone is a continuous humming sound which you will hear after lifting the receiver. Do not dial until you hear this tone.

### 2. Dial the number as it appears in the directory.

Suppose, for example, that you wish to dial 452. Place your finger in the hole over the "4", turn the dial until your finger strikes the stop, then remove your finger and let the dial return to normal of its own accord (do not interfere with the motion of the dial as it is returning, as this may cause a wrong number). Repeat the same operation for the "5" and the "2".

If your finger slips or you make a mistake while dialing, hang up for a moment; then lift your receiver, listen for the dial tone, and dial the complete number over again.

### 3. If the line is busy you will hear the busy signal; if not busy you will hear the ringing signal.

The busy signal is a rapid "da-da-da-da-". The ringing signal is an intermittent "burr-r-ing" sound. The ringing will automatically continue until your party answers or you hang up.

### 4. Be sure to hang up your receiver when you have finished calling.

If your receiver is left off the hook, nobody on your line can use his phone.

If you have finished one call and wish to call another party, hang up your receiver for a moment; then lift it and listen for the dial tone before dialing the new number.

## To Call the Operator—Dial "0"

When you Dial "0" you will be connected to the White Salmon operator. She will handle long distance calls, as well as requests for information, trouble reports, etc. No toll charge will be made for information, time and similar services.

## To Call On Your Line

If the first two digits of a number you wish to call are the same as the first two digits of your own number, that number is on your line. For example, if your number is 213, then 211, 212, 214, etc., are on your line.

To call a phone on your line, dial its number in the usual manner, and then hang up. (You will hear the busy signal after dialing; ignore this). When you hang up, the phone you called will start to ring. Allow 8 or 10 seconds for the number to ring; then lift your receiver to talk.

## Miscellaneous

**RINGING**—Selective ringing is provided on all phones; in other words, you will hear only you ring and one other, although there may be as many as ten parties on your line.

**INTERFERENCE**—If someone on your line lifts his receiver while you are dialing, your dialing will be interfered with. Similarly, if you lift your receiver while someone else on your line is dialing, his dialing will be interfered with.

If you hear someone come on the line before you have finished dialing, tell him the line is in use. After he has hung up, hang up your receiver for a moment; then lift it and dial the complete number over again. This procedure is necessary only if someone comes on the line before you have finished dialing; if someone comes on the line after you have dialed, your call will not be affected.

If you hear someone else on the line dialing when you lift your receiver, excuse your interruption and hang up, so that the other party may dial his number again.

## (READ INSTRUCTIONS CAREFULLY) TO MAKE A CALL

Remove the receiver from the hook, then dial desired number in the usual way.

If called party's line is busy, a busy tone will be heard. If this busy tone is encountered hang up the receiver and try again in a few minutes. If the line is not busy a ring back tone will be heard, indicating the called party is being rung.

## TO CALL A PARTY ON THE SAME LINE

Where the first two digits of any two or more telephone numbers are the same, this indicates a party line, for example, 462 wishes to call 464. To make the call, remove the receiver and dial in the usual way, after dialing the busy tone will be heard. Then hang up the receiver and allow sufficient time to elapse for two or three ringing periods before the receiver is again removed from the hook.

Please bear in mind that automatic telephone equipment will not stand excessive use and if a dial is forced on the return, this will result in wrong numbers and inefficient service. Allow the dial to return to normal of its own accord.

Service complaints and all information regarding the service shall be reported to the Lyle operator.

A fast and convenient arrangement has been established for toll service, in that a subscriber to the Klickitat Exchange may dial the following exchanges direct, Goldendale, Lyle or White Salmon, where the call will be handled in the usual way.

## Travel by Long Distance Telephone

The new Long Distance Rates make Telephone Travel inexpensive, as well as convenient, fast and satisfactory.

The operator will be glad to quote you rates!

## Use the Following Ringing Code On All Lines

To call a subscriber on the same line with your telephone use the following code:

The last figure or letter and figure, of a number, indicate the number and character of the ring as follows:

- 1 One Short Ring.
- 2 Two Short Rings.
- 3 Three Short Rings.
- 4 Four Short Rings.
- 5 Five Short Rings. (Also used for One Long Ring).
- 6 One Long Ring and One Short Ring.
- 7 One Long Ring and Two Short Rings.
- 8 One Long Ring and Three Short Rings.
- 9 One Long Ring and Four Short Rings.
- X Two Long Rings.
- X1 Two Long and One Short Rings.
- X2 Two Long and Two Short Rings.
- X3 Two Long and Three Short Rings.
- X5 Three Long Rings.
- Y One Short and One Long Ring.
- Y1 One Short, One Long and One Short Ring.
- Y2 One Short, One Long and Two Short Rings.
- Y3 One Short, One Long and Three Short Rings.
- Z Two Short and One Long Ring.
- Z1 Two Short, One Long and One Short Ring.
- Z5 Two Short and Two Long Rings.
- K Three Short and One Long Ring.

The first part of the telephone number designates the line number and the last indicates the number and character of the ring. For example:

72X2 is two long and two short rings on line 72; 453 is three short rings on line 45; 63 is three short rings on line 6; 76Y1 is one short, one long and one short on line 76.

# *Answer Your* **TELEPHONE**

*Promptly!*

Little things seem so unimportant. But today, telephone facilities are being taxed to the utmost and new equipment is hard to get, so little things do mean much. Please answer promptly—be brief—that central office equipment can be released quickly. You'll be helping yourself and your community.

# Those Who Get Things Done Have a TELEPHONE

Busy, active people—people that get things done—have a Telephone. A Telephone at home. It doesn't matter what their interest—business, farm, social or the task of running a modern home—they know that the Telephone will come to their aid often and make their job easier. They know it releases time to use and get things done.

**OREGON-WASHINGTON  
TELEPHONE COMPANY**

## GENERAL RULES AND REGULATIONS

### Allowance for Failure of Service—

The Telephone Company does not guarantee uninterrupted working of its lines or equipment. In case service is interrupted otherwise than by the negligence or willful act of the subscriber, an adjustment will, upon application by the subscriber, be made in the amount of the charges for such of the service, equipment, and facilities furnished as are rendered useless or inoperative. Any adjustment shall apply only to the period the interruption continues beyond twenty-four (24) hours after notice in writing of the interruption is received by the Telephone Company. No other liability shall in any case attach to the Telephone Company.

### Change of Telephone Number—

The Company reserves the right to change any telephone number at any time to meet service requirements. However, no change will be made until the subscriber has received reasonable notice of such proposed change.

### Default of Payment or Other Breach of Contract—

All bills are due when rendered. Failure to receive a bill will not exempt the subscriber from prompt payment. In the event of any default of payment, or other breach of the rules, the company reserves the right upon proper notice to discontinue the subscriber's service or disconnect and remove the telephone equipment.

### Directories—

The telephone directory is published for the convenience of subscribers, but the company assumes no liability for damages to subscribers due to errors or omissions. No change in listings will be made or new listings inserted in the next issue of the directory, unless the necessary work of making the change or installation involved is completed before the directory form closes for the printers. The telephone directory is issued by and is the property of the Oregon-Washington Telephone Company, and shall be destroyed upon delivery of each later issue. All persons are warned against attaching any unauthorized advertisements, binder, holder, auxiliary cover or attaching any device that will in any way obscure or interfere with any authorized advertisement in the directory or on the cover thereof.

### Foreign Equipment and Advertising Rules—

The telephone equipment shall not be connected with any foreign equipment such as advertising novelties and devices for eliminating noise, aiding transmission, and destroying germs. Telephone instruments are designed to produce the best results and are necessarily sensitive and intricate. The many devices offered for sale are not only unnecessary but generally cause trouble, either of a mechanical nature or by marring the telephone instrument. In order to protect its service and equipment the Telephone Company will remove all advertising novelties and foreign devices from its instruments.

### Information and Transmission Service—

The Telephone Company assumes no liability for errors which may arise in imparting information nor for any errors or delays in transmission over the instruments and lines of the Telephone Company.

### Right of Access to Premises—

The agents of the company shall have the right to enter the premises of the subscriber, at all reasonable hours, for the purpose of inspection, repair or removal of the Company's equipment or wiring. The Company reserves the right to make observations of service rendered to the subscriber for the purpose of improving the service by detecting trouble or annoyances, or the improper use of the service by the subscriber. The subscriber has the right at all times to have proper identification of Telephone Company employees before permitting entry to premises or removal of Telephone Company property.

### Use of Equipment by Subscribers—

The service is for the exclusive use of the subscriber, his employees and members of his family. The equipment shall be surrendered to the Company upon the termination of the subscriber's contract. The Company reserves the right to take the line at any time, except on long distance or business calls, after five minutes time has elapsed. Your cooperation helps to give better service.

## LONG DISTANCE SERVICE

To place a long distance call remove the receiver from the hook and Dial 0.

Information regarding the various classes of long distance service follows:

### Station-to-Station Service—

Should be used when you will speak with anyone who may answer the called telephone or when you know that the person with whom you wish to speak can be promptly summoned to the telephone by the answering party.

Rates for station-to-station service are lower than for other classes of long distance service because less operator labor and use of equipment are required.

### Person-to-Person Service—

Should be used when you wish to speak with a specified party. The rate for this class of service is somewhat higher than for station-to-station service as more time and labor is required to complete the call.

### Day, Night, and Sunday Rates for Station-to-Station and Person-to-Person Calls—

Day rates apply between 4:30 a. m. and 7:00 p. m. on all days except Sundays.

Night rates apply between 7:00 p. m. and 4:30 a. m.

Sunday rates apply on Sundays between 4:30 a. m. and 7:00 p. m.

### Appointment Calls—

May be made when you wish to talk with a specified party at a designated time. The

rate for this class of call is the same as the person-to-person rate.

### Messenger Calls—

When it is necessary to send a messenger to summon the person called to a telephone, it becomes a messenger call. The rate for this class of call is the same as the person-to-person rate plus the messenger charges.

### Reversal of Charges—

Charges may be reversed on all classes of long distance calls at any time without extra cost, except on station-to-station calls for which the rate is 20 cents or less.

### Report Charge—

A report charge is made on uncompleted person-to-person, messenger and appointment calls when failure to establish the connection is due to no fault of the Telephone Company. A report charge is also made on reversed station-to-station calls when the party answering the called telephone refuses to accept the charge and as a result the call is not completed.

(Report charges are subject to revised tariffs filed by the Pacific Telephone & Telegraph Co. governing interstate land line hauls).

### Rates and Charges—

Call the Chief Operator for a full explanation of different classes of long distance service and rates.

Subscribers are held responsible for ALL TOLL CALLS originating at the telephones.

## DIALING INSTRUCTIONS

For EMERGENCY NUMBERS See First Page of Directory

Emergency numbers which may be dialed for Fire, Police, etc., are listed on the first page of the directory. Or you may dial the operator and say: "I Want To Report A Fire" or "I Want The Police", and the operator will assist you with your call.

### Dial Tone—

The dial tone is a smooth continuous humming sound which you will hear shortly after lifting the receiver. Do not dial until you hear this tone.

If you start to dial before hearing the dial tone, your call will fail. If you were using a manual telephone, you wouldn't think of giving your number until you heard the operator say "Number, Please". By the same token you should never start to dial until you hear the dial tone.

### How To Dial—

After hearing the dial tone, place your finger in the hole over the first digit of the number and turn the dial clockwise until your finger hits the stop. Withdraw your finger and allow the dial to return of its own accord to normal; never try to force its return. Repeat this operation for each of the other digits or numbers in order.

For example, to dial 4962: Place your finger in the hole over the "4", pull the dial around until your finger hits the stop, then withdraw your finger. After the dial has reached its normal position, place your finger in the hole over the "9", pull the dial around to the stop, and release it again. Repeat the same operation for the "6" and the "2".

Do not interfere with the dial as it is returning to normal, as any attempt to hasten or retard its motion may cause a wrong number. The switching operation of the dial takes place while it is returning to normal, not when you are "winding it up".

### Mistakes—

If you make a mistake or your finger slips, stop dialing and replace the receiver. After a moment remove it and listen for the dial tone, then dial the complete number again.

### Don't Hurry—

Many persons feel ill at ease or become confused because they feel that they must "keep moving" when they dial the number. Actually you can take as much time as you want. After hearing the dial tone, you can wait as long as you please before starting to dial. You can wind up the dial just as slowly or rapidly as you wish, and can pause just as long as you wish between each digit.

### Ringing Signal—

If the number you are calling is not busy, you will hear the ringing signal shortly after you have finished dialing. Allow a reasonable length of time for someone at the called station to answer.

### Busy Signal—

If you hear the busy signal when you are through dialing, it means that the called line is busy. Hang up and try later.

If you should happen to get the busy signal when dialing Odell, Parkdale, or White Salmon, it indicates that all the circuits to these exchanges are busy.

On rare occasions you may hear the busy signal when you first lift your receiver to make a call. This is an indication that all the switching circuits in the central office are busy, and you should hang up and try again in a few minutes. Ordinarily more than enough circuits are provided to take care of the maximum number of calls. However, due to the extremely heavy load at time, we would appreciate your co-operation in not carrying on any unreasonably long conversations.

**Calling the Operator—**  
To call the operator, lift your receiver and listen for the dial tone, then dial the single digit "0". The operator will receive your call in exactly the same manner as if you had lifted the receiver on a manual phone.

The operator may be called to obtain information or assistance if you have trouble dialing a number, and emergency calls such as reporting a fire or calling the police.

**To Make A Call In The Dark—**  
Lift your receiver and listen for the dial tone, then place your finger in the hole just to the left of the finger stop, or digit "0". Pull the dial around until your finger touches the stop, and then release it. When the operator answers, give her the number you wish to call.

It might be well to try this a few times (leaving the receiver on the hook if you do not wish to actually call the operator); then if an emergency should arise you would have no trouble knowing what to do.

**Calling Long Distance—**

Numbers to dial for Long Distance, and for Odell, Parkdale and White Salmon, are listed on inside of front cover. Calls to Lyle, Klickitat, Goldendale, Glenwood, and Trout Lake, will be handled by the White Salmon operator. For all other out-of-town calls (except Odell and Parkdale), dial Long Distance.

**Calling On Your Line—**  
To call a number on your own line you will have to dial the operator. When the operator answers, say "On This Line.....," giving the number you wish to call; then hang up for 5 to 10 seconds to allow time for your party to be rung.

**Successive Calls—**

If you wish to make several calls in succession, hang up your receiver for a few moments after each call; then lift your receiver and listen for the dial tone before making the next call. It takes a short time after you have hung up for your connection to release; therefore a quick jiggle of the receiver hook is not sufficient to break your connection. Hang up for two or three seconds between each call.

**Interference—**

If someone else on your line lifts his receiver while you are dialing, your dialing will be interfered with. Similarly, if you lift your receiver while someone else on the line is dialing, his dialing will be interrupted.

**Special Instructions To Avoid Difficulties**

If you hear dialing clicks (a series of loud clicks) when you lift your receiver, excuse your interruption and hang up, so that the other party may dial his number again.  
If you hear someone else come on the line before you have finished dialing, inform him

## SPECIAL INSTRUCTIONS TO AVOID DIFFICULTIES

### Interference—

If someone else on your line lifts his receiver while you are dialing, your dialing will be interfered with. Similarly, if you lift your receiver while someone else on the line is dialing, his dialing will be interrupted.

If you hear dialing clicks (a series of loud clicks) when you lift your receiver, excuse your interruption and hang up, so that the other party may dial his number again.

If you hear someone else come on the line before you have finished dialing, inform him

that the line is in use. After he has hung up, replace your own receiver for a few moments; then lift your receiver, listen for the dial tone, and dial your number again.

#### Dialing Too Rapidly—

Under certain conditions, dialing with extreme speed may cause your call to fail. In the central office a certain switching operation takes place **after** you have dialed the first digit of your number and **before** you have dialed the second digit. Although this operation requires only a small fraction of a second, it is possible to dial a number such as "1111" so very rapidly that a failure might occur. After each digit that you dial, be sure

that the dial returns all the way to normal before dialing the next digit.

**DO NOT MOVE YOUR DIAL DURING A CONVERSATION AS THIS MAY INTERRUPT YOUR CONNECTION.**

#### Playing With The Dial—

In a family where there are small children, it is always a temptation for the youngsters to play with the dial. A child can easily remove the receiver from the hook, and by playing with the dial accidentally ring someone's number, causing him much annoyance and inconvenience. Please give us your cooperation in this respect.

#### REPORTING TROUBLE

Trouble may be reported by dialing the Wire Chief's Office, at 6262.

In any system there may be some minor troubles and interruptions; therefore, if you will report to us any difficulty you may have, giving full details, it will help us to

provide the best possible service.

If there is anything that you do not understand, or you wish further information on the operation of your dial phone, call the telephone office, and we will gladly give you whatever assistance you need.

*Life's*  
**TOO SHORT  
 TO BE  
 WITHOUT A  
 TELEPHONE**

## INSTRUCTIONS FOR PARKDALE AND ODELL EXCHANGES

Listen on the line before ringing and hang up receiver at once if the line is busy.

Use your telephone whenever necessary but avoid all unnecessary use and be brief. It is often inconvenient and annoying to wait for the use of the line while others are talking on matters of no importance.

To call a subscriber on the same line with your telephone, use the following code:

The last figure or letter and figure, of a number, indicate the number and character of the ring as follows:

- 1 One Short Ring.
- 2 Two Short Rings.
- 3 Three Short Rings.
- 4 Four Short Rings.
- 5 Five Short Rings (Also used for One Long Ring).
- 6 One Long and One Short Ring.
- 7 One Long and Two Short Rings.
- 8 One Long and Three Short Rings.
- 9 One Long and Four Short Rings.
- X Two Long Rings.
- X1 Two Long and One Short Ring.
- X2 Two Long and Two Short Rings.
- X3 Two Long and Three Short Rings.
- X5 Three Long Rings.

The first part of the Telephone Number designates the line number and the last indicates the number and character of the ring. For example:

72X2 is two long and two short rings on line 72; 453 is three short rings on 45; 63 is three short rings on line 6.

There is a toll charge between Odell or Parkdale and Hood River as follows:

First 5 minutes or fraction thereof .....	\$ .05
Each additional 5 minutes or fraction .....	\$ .05

## MOSIER DIALING INSTRUCTIONS

### 1. Lift the receiver and listen for the dial tone.

The dial tone is a continuous humming sound which you will hear after lifting the receiver. **Do not dial until you hear this tone.**

### 2. Dial the number as it appears in the directory.

Suppose, for example, that you wish to dial 3451: Place your finger in the hole over the "3," turn the dial until your finger strikes the stop, then remove your finger and let the dial return to normal of its own accord (do not interfere with the motion of the dial as it is returning, as this may cause a wrong number). Repeat the same operation for the "4," "5," and the "1."

If your finger slips or you make a mistake while dialing, hang up for a moment; then lift your receiver, listen for the dial tone, and dial the complete number over again.

### 3. If the line is busy, you will hear the busy signal; if not busy you will hear the ringing signal.

The busy signal is a rapid "da-da-da-da." The ringing signal is an intermittent "burr-r-r-ing" sound. The ringing will automatically continue until your party answers or you hang up.

### 4. Be sure to hang up your receiver when you have finished calling.

If your receiver is left off the hook, nobody on your line can use his phone.

### 5. The Mosier switchboard is equipped with an automatic cut-off which limits the time the line may be held in continuous conversation.

This cut-off is set to operate any time between six and eight minutes after the beginning of your call. This cut-off will not affect long distance calls going out through Hood River or The Dalles.

### SPECIAL NUMBERS—Long Distance:

Hood River, dial..... 0      The Dalles, dial..... 9      Lyle, dial..... 2222

**TROUBLE CALLS**—Dial "0" (Hood River) and ask for 6262. Please report any trouble on your lines or telephone to this number. Sundays, nights and holidays, give your report to the operator.

**TO CALL ON YOUR LINE**—If the two middle digits of a number you wish to call are the same as the two middle digits of your own number, that number is on your line. For example, if your number is 2213, then 2211, 3212, 3214, etc. are on your line. To call a phone on your line, dial its number in the usual manner, then hang up. (You will hear busy signal after dialing; ignore this). When you hang up, the phone you called will start to ring. Allow 8 or 10 seconds for the number to ring; then lift your receiver to talk.

### MISCELLANEOUS

**Ringling**—Selective ringing is provided on all phones; in other words, you will hear only your ring, although there may be as many as ten parties on your line.

**Interference**—If someone on your line lifts his receiver while you are dialing, your dialing will be interfered with. Similarly, if you lift your receiver while someone else on your line is dialing, his dialing will be interfered with.

If you hear someone come on the line before you have finished dialing, tell him the line is in use. After he has hung up, hang up your receiver for a moment; then lift it and dial the complete number over again. This procedure is necessary only if someone comes on the line before you have finished dialing. If someone comes on the line after you have dialed, your call will not be affected.

If you hear someone else on the line dialing when you lift your receiver, excuse your interruption and hang up, so that the other party may dial his number again.
